

Keystone Alpine 7 way Cable wiring from plug to pin box junction box

Seven Way RV plug OEM standard wiring of the black cable from the pin box junction box located inside the pin box out to the seven way plug

The YELLOW WIRE is usually not connected to anything inside the pin box as will be shown in the next image...

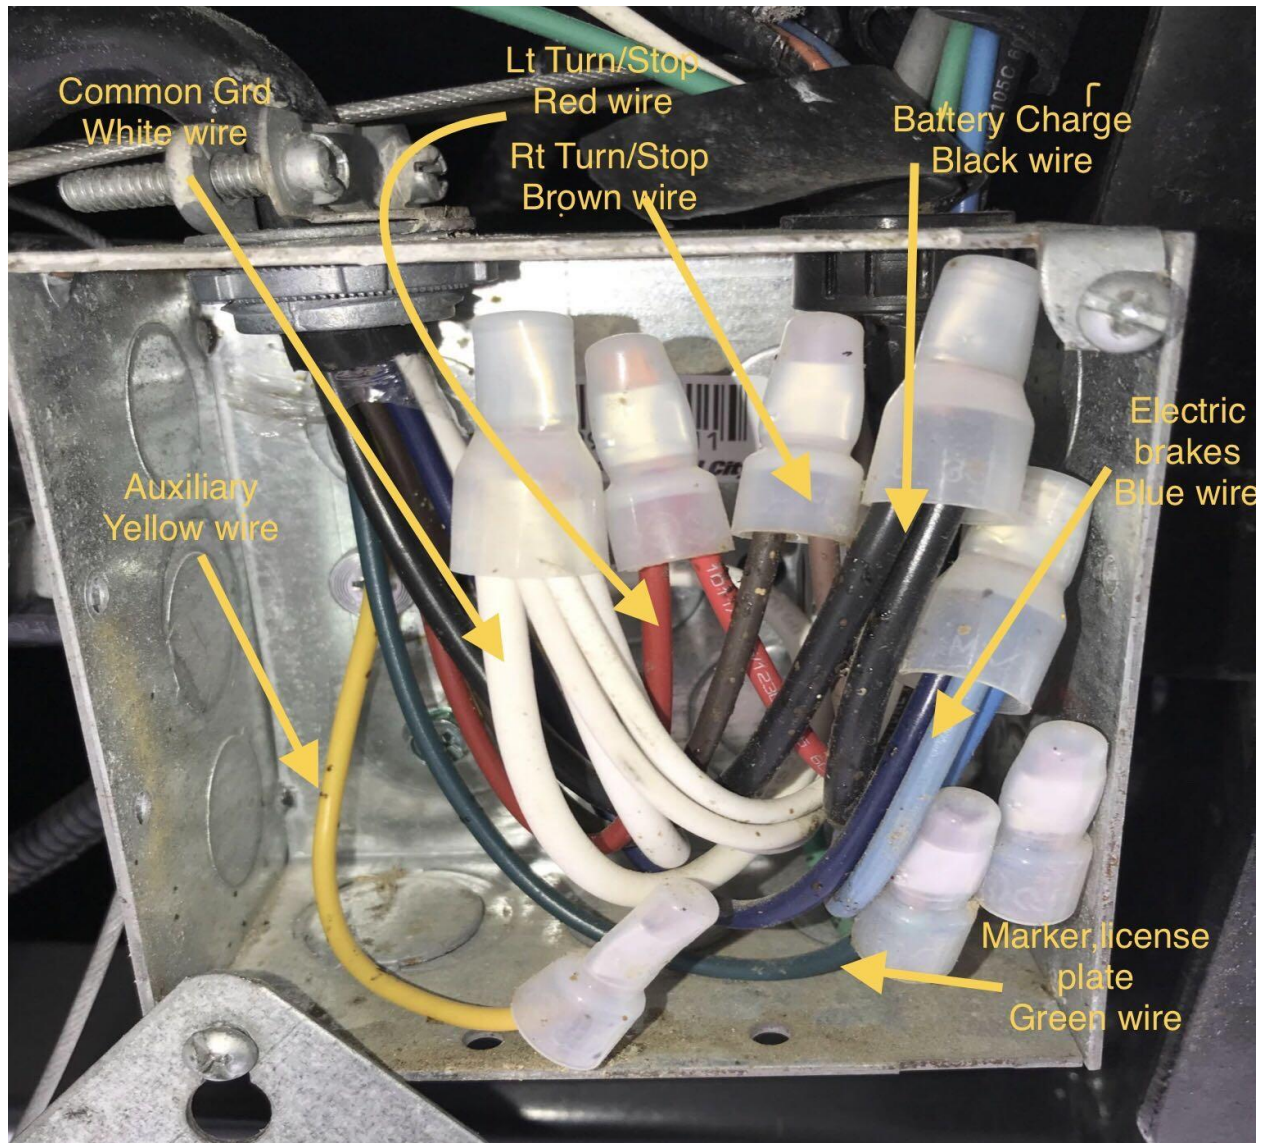

Image above is from my 2014 Alpine.. OEM factory wiring. This area should be closely inspected where the large black cable feeds in from the 76 way plug AND each wire that feeds thru into the box.. Look for any evidence of chafing, burned spots, etc and correct immediately

Marker, Tail, & License Lights		GREEN	16 ga	7-Way RV Connector Green/White Ripcord
Left Stop & Turn		RED	16 ga	
Right Stop & Turn		BROWN	16 ga	
Electric Brake		BLUE	Varies	
Common Ground		WHITE	10 ga	
Battery Charge		BLACK	10 ga	
Center Auxiliary		YELLOW	16 ga	

Keystone OEM Color code wiring for all trailer signal lights, brakes, 12 volt power feed
